CONTENTS OF A PORTFOLIO

- A portfolio is composed of three main elements:
- Content this includes the actual work you want to showcase and can be anything from writing samples to photographs or videos
- **Design** the design should reflect your personality and style while remaining professional. It should also make it easy to navigate the portfolio
- Summary a brief summary at the beginning of the portfolio will help provide an introduction to your work and give visitors a better understanding of yourself and what you have created

WHAT IS A PORTFOLIO?

→Arter and Spandel-a purposeful collection of student work that tells the story of the students efforts, progress or achievement in a given area.

- Student participation in selection of portfolio content
- The guidelines for selection, the criteria for judging merit, and evidence of student self-reflection.

TYPES OF PORTFOLIO

- I. Evaluative portfolio
- II. Working portfolio
- III. Showcase portfolio
- IV. Archival portfolio

Evaluative portfolio:

- Use to analyze a student's progress relative to program goals, objectivesor standards.
- Includes work samples, anecdotal records, reading/writing logs, checklists, tests data and parent comments.

Working portfolio:

- An evolving repository of student thoughts, ideas, growth, and accomplishment
- Work examples are chosen by both teacher and students
 Highlights the ongoing process of learning, not just the finished

Showcase portfolio:

- Only includes the student's best work.
- Work in progress in not included.
- Intended to motivate students through complete finished products.
- In isolation, it is not adequate to guide instruction.

Archival portfolio:

- Gives the student's next teacher a 'snapshot' of student's developing abilities.
- Items are selected because they provide a summative record.
- Intended to guide next year's teacher with planning appropriate instruction

PREVIOUS PROJECTS

HEART BEAT MONITORING USING PULSE RATE SENSOR

WEATHER PREDICTION.

This simple project involving Arduino UNO and heartbeat sensor Modules is designed here which can calculate the heart rate of a person. It can be used as an inexpensive alternative to smart watches and other expensive heart rate monitors

The Weather Prediction App is a user-friendly and reliable application designed to provide real-time weather forecasts and updates to users. It allows users to access accurate weather information for their current location or any specified location worldwide. The app offers a visually appealing and intuitive interface, making it suitable for

SKILLS AND QUALIFICATIONS

LEADERSHIP

I possess leadership abilities that have been sharpened through past roles where I was responsible for the teams"

PROBLEM-SOLVING

"My problem-solving capabilities have enabled me to solve difficult issues in the past, using creative and innovative solutions

TECHNICAL SKILL

I am knowledgeable in several technical areas such as programmming languages that support my ambition in my field

INTERPERSONAL SKILL

Teamwork is one of the essential part of my daily job, and I am sensitive towards different cultures"

ORGANIZATION

My proactivity allows me to plan ahead and prioritize tasks according to objectives and different deadlines

About Me

Seeking an entry-level postion in the field of Information Technology in a reputed organization where i can improve my knowledge and skills. As a dedicated and driven individual, I aim to apply my problem-solving skills and creativity to develop robust software solutions.

Education

Certifications

2020-2024

B. Tech-Malineni Lakshmaiah Womens Engineering College

018-2020

Intermediate-Sri chaitanya junior collage

2017-2018

SSC - Sri chaitanya Techno school

NPTE

Cloud Computing

MICROSOFT

Azure Fundamentals and Power Platform Fundamentals

Courser

Machine Learning with Python
